<b>OBJECTIVES</b>	Investigating the neurophysiological mechanisms of brain activity in health and diseases through computational modelling and AI/ML approaches.
<b>EDUCATION</b>	<i>Bachelor of Science</i> , Interdisciplinary Science McGill University, Qc, CA, expected May 2023 Concentration: Neuroscience (Major) & Computer Science (Minor) Current cGPA: 3.97
<b>RESEARCH EXPERIENCE</b>	<i>Research internship</i> May 2021-Now The Neuro at NeuroSPEED-BailletLab, Qc, CA  Summer research project (2021): <ul style="list-style-type: none"><li>• Literature review of multi-scale modelling approaches with a focus on The Virtual Brain (TVB), and of model calibration approaches for dynamical models.</li><li>• Implementation of a simulation workflow and testing of the different calibration approaches for a TVB model with magnetoencephalography (MEG) data.</li></ul> NSERC USRA summer project (2022): <ul style="list-style-type: none"><li>• Design and implementation of a novel parameter space reduction algorithm that guides search-based optimization algorithms in high-dimensional space.</li><li>• Writing of the API for neural networks and other components of the algorithm.</li><li>• Implementation of accelerated simulator models for neurons and neural masses.</li><li>• Implementation of various search algorithms for performance testing.</li><li>• Writing of a manuscript reporting the algorithm and its performance.</li></ul>
<b>VOLUNTEER EXPERIENCE</b>	<i>Undergraduate Research Lead</i> January 2022-July 2022 Youreka Canada, CA  Youreka project: <ul style="list-style-type: none"><li>• Acting as PI for a research project with a team of 3 high school students.</li><li>• We established a proof of concept for COVID-19 case forecasting using time series linear regression on vaccination data from daily US updates.</li><li>• We wrote a manuscript reporting our results, prepared a poster and performed a presentation at the Regionals. We won and also presented at the Nationals.</li></ul>
<b>RELEVANT SKILLS</b>	Computer skills: <ul style="list-style-type: none"><li>• Extensive experience with relevant libraries such as numpy, pytorch, etc.</li><li>• Significant experience interacting with open source projects.</li><li>• Significant knowledge of AI/ML models and optimization algorithms.</li></ul> General skills: <ul style="list-style-type: none"><li>• Great creative problem solving capacities and autonomy.</li><li>• Great communication and teaching abilities in official and non-official settings.</li><li>• Good leadership abilities in a research or problem solving setting.</li></ul>
